Course Overview

The rationale of the Diploma is to provide a career path for learners who wish to develop their core capabilities within the cyber security and risk management sector. The outcome of the Diploma, which is a recognised UK Qualification, is for learners to develop the cyber security skills required by organisations globally. It is also to provide a pathway via learner credits and potential direct entry into related Level 6 Cyber Security and/or Risk Management Degree programmes.

This Level 5 qualification is potentially unique because it is about 'cyber security' as a workplace management discipline. It is therefore a semi-technical qualification that examines technical cyber security measures as well as the management, project management and leadership skills required to organise internal and external business responses to major incidents (or the threat of such).

Modules

- Cyber Security Threat and Risk
- Network Security and Data Communications

- Database Security and Computer Programming
- Incident Response, Investigations and Forensics
